Forecast for Saturday 07 Nov 2020

Weather: Low cloud and low level mist and fog likely across eastern hills but some long clear spells in the west. Remaining mostly cloudy in the east with some good spells of sunshine in the west, although cloud in the west does increase towards dusk. Then a cloudy evening with a little rain at times.

Chance of cloud free mountain/hill tops above 600m: Close to 100% in the west with little or no cloud expected below the summits until late afternoon but nearer 40% in the east with occasional or periods of cloud above 450m. Chances fall through the evening as cloud increases.

Visibility: Very good, although a kilometre or less in overnight low level mist and fog patches.

Forecast for Sunday 08 Nov 2020

Weather: Cloudy with occasional rain, becoming more persistent and occasionally heavy for a time around dawn. The rain soon clears but it remains cloudy, although some brighter spells are likely in the afternoon, especially across more northern hills.

Maximum wind: Southeasterly 10-15mph.

Chance of cloud free mountain/hill tops above 600m: Close to zero through the morning with periods or persistent cloud above 450m and patches below rising to 600, but becoming nearer 40% in the afternoon with cloud more occasional above 600m and higher across the north as cloud lifts to around 750m

Visibility: Very good falling to just a few kilometres in heavier rain.

Temperature: **Valleys:** Plus 8 or 9 Celsius at dawn rising to 12 or 13 Celsius by day.
At 600m: Plus 8 Celsius
Freezing level: Above the summits
